Will it Sink or Float?

1. Draw a picture of one item that you want to test in each box on the left.
2. In the box next to each picture, circle if you think the item will sink or float. This is your *prediction*.
3. Drop the object into the water and watch what happens. Was your prediction right? Circle sink or float to show what happened. This is the *result* of your experiment.

Draw a picture of each object.	What do you think will happen?	What happened?
	sink float	sink float
	sink float	sink float
	sink float	sink float
	sink float	sink float
	sink float	sink float
	sink float	sink float
	sink float	sink float
