

Science in the Atomic Age

Table of Contents

Chapter 1: The Scientific Method and Experimentation..... 1

Introduction	1
The Scientific Method	1
Laying Down the Law	4
Scientific Theories and Laws Can Be Wrong.....	4
How Science Can Relate to Concepts Not Part of the Natural World	6
Doing Experiments	7
Experiment 1.1: Getting the “M’s” off M&M’s.....	7
Documenting Experiments	9
How to Document the Previous Experiment	10
Lab Reports in Other Science Courses	11
Advice for the Rest of the Course.....	12
Answers to the Comprehension Check Questions.....	13
Chapter Review	14

Chapter 2: Our Model of the Atom 15

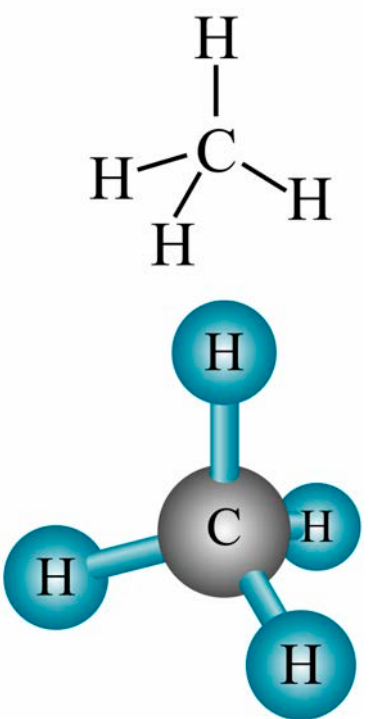

Introduction	15
Learning That Atoms Are Made of Different Particles	15
Experiment 2.1: Making Charges	15
Measuring Ratios	17
Experiment 2.2: Measuring Mass-To-Volume Ratio	19
The Beginning of a Model for the Atom	20
An Improved Model for the Atom.....	23
More about the Planetary Model of the Atom.....	26
Experiment 2.3: Centripetal Force.....	27
Atoms and Light	29
Testing the Crazy Assumption.....	33
Explaining One Crazy Assumption with Another.....	34
There’s Something Else Going on Here	37
Answers to the Comprehension Check Questions.....	41
Chapter Review	43

Chapter 3: Elements and Compounds.....45

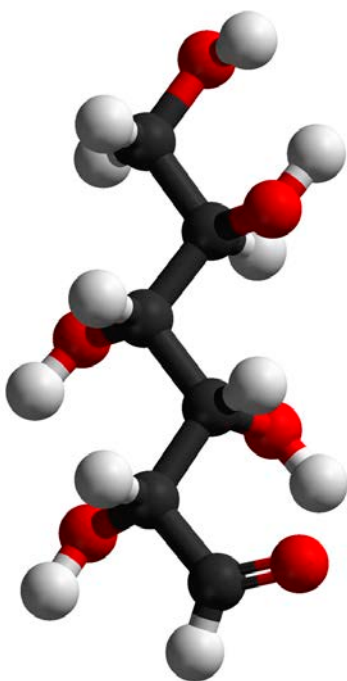

Introduction	45
The Discovery of an Important Gas in Air	45
Experiment 3.1: Density of Gases	46
The Noble Gases.....	48
Experiment 3.2: Gas Inside a Solid	48
The Importance of the Noble Gases	50
Atomic Number and Its Meaning	52
Atomic Mass.....	55
“Experiment” 3.3: The Average Value of a Coin.....	56
More About Mass	57
The Symbols for Elements.....	58
Why Is The Periodic Table’s Shape So Strange?	59
What Makes an Element Stable?	62
Experiment 3.4: How Chlorine Becomes Stable	63
Ionic Charge.....	66
Ionic Compounds.....	67
The Elements That Follow the Rules and the Ones That Don’t.....	69
How to Identify Ionic Compounds, Even Ones That Break the Rules...	69
Answers to the Comprehension Check Questions.....	71
Chapter Review	73

Chapter 4: Covalent Compounds.....75

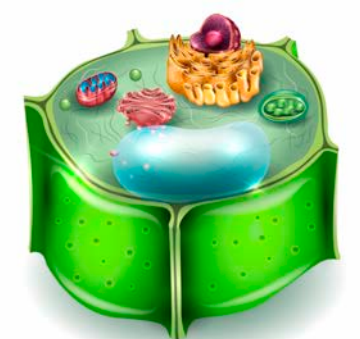

Introduction	75
Lewis Structures	75
Covalent Compounds.....	80
More Covalent Compounds.....	82
Exceptions to the Octet Rule	83
Comparing Covalent and Ionic Compounds.....	84
Experiment 4.1: Melting Points of Ionic and Covalent Compounds.....	84
The Phases of Matter	85
Covalent Attraction.....	88
Comparing Polar and Nonpolar Molecules	90
Experiment 4.2: Comparing the Attraction of Polar and Nonpolar.....	90
Another Interesting Comparison	91
Experiment 4.3: Comparing How Two Substances Freeze	92
An Important Consequence of Water Expanding When It Freezes.....	93
But Why Does Water Expand When it Freezes?.....	95
Hydrogen Bonding.....	96
But What About Metals?	97
Answers to the Comprehension Check Questions.....	98
Chapter Review	101

Chapter 5: Chemistry in Living Things 103

Introduction	103
A Few More Covalent Bonds	103
Simple Sugars	105
Carbohydrates	107
Experiment 5.1: Comparing a Disaccharide and a Polysaccharide	108
Lipids	110
Experiment 5.2: Comparing Saturated and Unsaturated Fats.....	111
Proteins	112
Experiment 5.3: Identifying the Presence of a Protein	113
Learning More About Proteins	114
Experiment 5.4: Diffraction.....	115
Proteins and Amino Acids	117
Changing a Protein’s Primary Structure	119
The Macronutrients.....	120
One More Really Important Chemical for Life	122
The Actual Structure of DNA.....	123
But What Does DNA Do?	125
Answers to the Comprehension Check Questions.....	127
Chapter Review	129

Chapter 6: The Cell 131

Introduction	131
The Size of Cells.....	131
Experiment 6.1: What Limits the Size of a Cell?	131
The Nucleus	133
Cell Theory	134
Another Organelle Discovered	136
The Mitochondrion	137
Experiment 6.2: Sensing the Products of the Mitochondria.....	138
The Cytoskeleton.....	139
The Centrosome.....	140
Endoplasmic Reticulum.....	141
Ribosomes.....	142
Lysosomes	142
Nucleolus	143
Putting it All Together	143
The Plasma Membrane	144
Experiment 6.3:A Semipermeable Membrane	145
Plant Cells.....	146
Experiment 6.4: Turgor Pressure.....	147
Prokaryotic Cells	148
Bacteria.....	150
Answers to the Comprehension Check Questions.....	152
Chapter Review	153

Chapter 7: More on Prokaryotic Cells 155

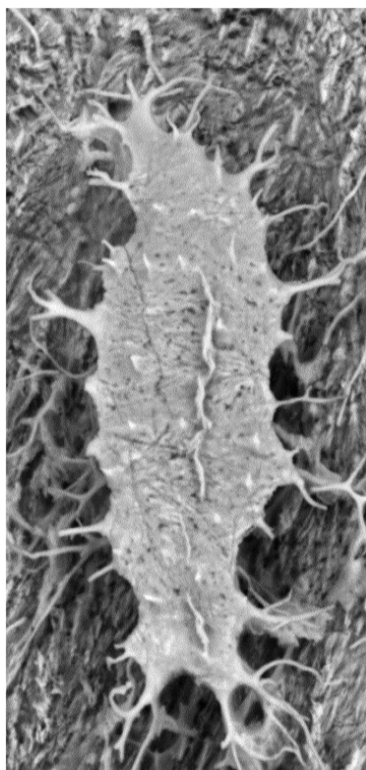

Introduction	155
Bacteria with Culture!	155
Experiment 7.1: Culturing Bacteria.....	156
Finishing the Culture	157
Experiment 7.1b: Culturing Bacteria, Part 2	158
Using Cultures to Treat the Sick.....	159
More on Antibiotics.....	160
Too Much of a Good Thing	162
A Brief Aside.....	162
Jumping to Conclusions.....	164
Beneficial Bacteria	165
Experiment 7.2: Digestive Enzymes.....	166
Bacteria and the Micronutrients	168
It's Not Just Vitamins and Digestive Enzymes	170
The Microbiome	172
Bacteria that are Beneficial to Many Organisms.....	174
Experiment 7.3: Nitrogen and Ammonia.....	175
Bacteria Living in Surprising Places	177
Mutualism Between Bacteria and Other Organisms	180
Another Way that Bacteria are Useful to Us	180
But Where Did the Pathogenic Bacteria Come From?.....	181
Answers to the Comprehension Check Questions.....	182
Chapter Review	184

Chapter 8: Plants 185

Introduction	185
Producers and Consumers.....	185
Another Brief Aside.....	186
Experiment 8.1: Blue From Pennies.....	186
Chemical Reactions	188
Chemical Equations	189
Photosynthesis	192
Experiment 8.2: Chlorophyll and... ..	194
Chlorophyll and Leaves.....	195
Deciduous and Evergreen.....	197
Leaf Differences	198
Experiment 8.3: The Effects of Surface Area.....	198
More on Photosynthesis.....	201
The Amazing Balance Between Producers and Consumers.....	202
Hard-Working Roots (and Their Friends)	204
Plant Reproduction	206
Sexual Reproduction in Plants.....	207
Seeds	209
Fruits.....	210
Answers to the Comprehension Check Questions.....	212
Chapter Review	214

Chapter 9: Tissues 215

Introduction 215
 Seeing Different Tissues..... 215
 Experiment 9.1: Some of the Tissues in a Chicken 216
 Identifying Tissue Based on Its Cells 218
 An Experiment About Bone Tissue 220
 Experiment 9.2: Rubberized Bone..... 220
 What Makes Bone Tissue? 220
 Experiment 9.2a: Rubberized Bone, Part 2 220
 Different Types of Tissues..... 223
 Muscle Tissue 224
 Experiment 9.3: How Muscle Cells Work..... 224
 Tendons as an Example of Connective Tissue 226
 Experiment 9.4: Tendons in Your Body..... 226
 Other Types of Connective Tissue 228
 Epithelial Tissue 229
 Functions of Epithelial Tissue 230
 Experiment 9.5: Stomach Protection 231
 Nervous Tissue 232
 Experiment 9.6: Jumping Signals 233
 Answers to the Comprehension Check Questions..... 236
 Chapter Review 237

Chapter 10: Skin and Bones 239

Introduction 239
 The Integumentary System 239
 Experiment 10.1: Two-Point Discrimination 240
 Hypodermis, Dermis, and Epidermis..... 242
 Experiment 10.2: Revealing the Unseen 243
 More on the Epidermis 245
 Hair and Nails 247
 Skeletal System..... 250
 Experiment 10.3: Why We Need a Skeleton 250
 Looking at Some Details 253
 What Happens When it Breaks? 255
 Joints in the Skeleton 257
 Experiment 10.4: Different Kinds of Joints..... 257
 Synovial Joints..... 260
 Experiment 10.5: A Model of Synovial Fluid 261
 But Why Do They Pop?..... 263
 Answers to the Comprehension Check Questions..... 264
 Chapter Review 265

Chapter 11: Muscles and Blood..... 267

Introduction 267

The Muscular System 267

Experiment 11.1: Antagonist Muscles..... 268

Skeletal Muscle Structure..... 270

Experiment 11.2: Multiple Threads..... 271

Levers 273

Experiment 11.3: Load, Fulcrum, and Effort in a First-Class Lever.... 273

Levers in the Skeletal and Muscular Systems 276

Smooth Muscles and the Cardiac Muscle..... 277

The Circulatory System 280

How the Heart Pumps Blood 282

How Much Blood Does Your Heart Pump? 285

Experiment 11.4: Taking Your Pulse 285

The Mixture that We Call Blood 286

Red Blood Cells..... 288

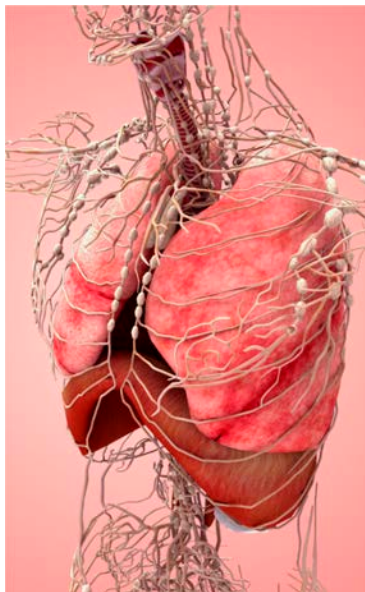

White Blood Cells..... 289

Hemopoiesis 291

Answers to the Comprehension Check Questions..... 293

Chapter Review 295

Chapter 12: The Respiratory and Lymphatic Systems..... 297

Introduction 297

The Respiratory System..... 297

Experiment 12.1: A Model of the Lungs and Diaphragm 298

How Much Air Can The Lungs Hold? 300

Experiment 12.2: Measuring The Vital Capacity of Lungs..... 300

Oxygenation of the Blood..... 302

Experiment 12.3: Gas Exchange With a Liquid 303

The Respiratory System and Voice 305

Experiment 12.4: A Model of Your Vocal Cords..... 307

The Lymphatic System 309

The Immune System 314

Acquired Immunity..... 315

The Other Lymphatic Organs 319

Evolutionists Thought They Were All Useless! 321

Answers to the Comprehension Check Questions..... 323

Chapter Review 325

Chapter 13: The Digestive and Renal Systems 327

Introduction 327

The Beginning of the Digestive System 327

Experiment 13.1: The Importance of Physical Digestion..... 327

More About the Mouth 330

Experiment 13.2: Water and Taste 330

Into and Out of the Stomach 333

Accessory Organs and the Digestive Tract..... 334

Experiment 13.3: Baking Soda and Digestion..... 334

More Accessory Digestive Organs 336

Experiment 13.4: Bile and Digestion 336

Through the Small Intestine 338

Through the Large Intestine 341

The Renal System..... 343

Experiment 13.5: The Importance of Concentration 343

The Kidneys..... 346

Experiment 13.6: The Kidneys 346

Answers to the Comprehension Check Questions..... 349

Chapter Review 350

Chapter 14: The Nervous and Endocrine Systems 351

Introduction 351

The Nervous System..... 351

Experiment 14.1: Response Time in the Nervous System 351

Central Nervous System: The Brain 353

Central Nervous System: The Hemispheres of the Brain..... 358

Experiment 14.2: Dominant Hemispheres..... 359

Central Nervous System: Reflexes 361

Experiment 14.3: Reflexes..... 362

Peripheral Nervous System: Sight..... 364

Experiment 14.4: Reversed Images 366

Peripheral Nervous System: Smell 367

Peripheral Nervous System: Taste..... 368

Peripheral Nervous System: Hearing 370

Peripheral Nervous System: Balance 371

The Endocrine System..... 372

A Masterpiece of Design 377

Answers to the Comprehension Check Questions..... 378

Chapter Review 380

Chapter 15: Organism, Population, and Community 381

Introduction 381

Organisms 381

“Experiment” 15.1: The Ideal Pet..... 382

Classifying Organisms 384

What Determines a Species? 387

Population 389

Experiment 15.2: Mark and Recapture..... 390

Why Population is Important..... 392

Attempts to Avoid Extinction..... 394

Another Issue Related to Population 395

Community 397

“Experiment” 15.3: Predator and Prey Populations 398

Balance in Communities..... 400

Losing Balance in Communities..... 401

How Balance Is Restored..... 403

Symbiosis..... 404

Answers to the Comprehension Check Questions..... 408

Chapter Review 410

Chapter 16: Ecosystem, Biome, Biosphere..... 411

Introduction 411

Ecosystem 411

Experiment 16.1: Examining Part of an Ecosystem 411

The Atmosphere..... 414

Experiment 16.2: What Happens When There Is Too Much Oxygen.. 415

Changing the Atmosphere 417

Nuclear Power 419

Ecosystems Have Fuzzy Boundaries 422

An Important Consequence of the Fuzzy Boundaries 424

Biomes 426

Biosphere 431

Caring for the Biosphere..... 436

Summing it All Up: The Design of the Biosphere 439

Answers to the Comprehension Check Questions..... 441

Chapter Review 443
