

TYPES OF CLOUDS

The three types of clouds pictured below are the most basic clouds, but there can be lots of other kinds of clouds, too. Sometimes there are combinations of these clouds and they can look a lot different depending on how high they are in the sky.

What kind of clouds are these?

What they look like: a thick blanket hanging from the sky

Weather they bring: rain, snow, or fog.

What kind of clouds are these?

What they look like: thin and wispy

Weather they bring: fair, but usually appear the day before rain or snow.

What kind of clouds are these?

What they look like: large, thick, and fluffy

Weather they bring: nice weather without rain or snow. (However, Cumulonimbus clouds bring thunderstorms!)
