ONE FULL
MONTH OF
LEARNING!

SPOTLIGHT ON STRUCTURE AND FUNCTION FOR SURVIVAL

Open your eyes to the unique traits that make species perfectly suited to survive in their habitats.

LEARNING GOALS:

- ✓ I can analyze data to provide evidence that organisms inherit traits and groups have variations of traits.
- ✓ I can show that variation in traits can be influenced by the environment.
- ✓ I can analyze fossil data to show the previous existence of organisms and their environments.
- ✓ I can explain how variation in a species provides advantages.

HOW TO USE THIS KIT:

Teacher Guide:

Science at home has never been easier with our Science Unlocked® Teacher Guides. Whether the teacher wants to learn alongside their student or have them learn independently, this guide was designed with all homeschool families in mind.

Student Workbook:

Dive right into the “wow” of science discovery at home with Science Unlocked®.

KEY

This question mark icon indicates a question for the student to answer.

These numbered yellow tabs appear in the same order in the Student Workbook and Teacher Guide, which signal that there are supportive instructions for the teacher to assist their student(s).

This icon indicates that a teacher's help is needed.

These arrows indicate a call to action.

The student will reflect on what they have learned.

The student will think about what they have seen.

The student will show what they know.
