

EYE SPY

SAMPLE

STUDENT WORKBOOK

ANCIENT EYES

We can see the traits of organisms that are alive today, but we must look to clues like fossils to learn about the traits of past organisms.

LEARNING GOALS:

- ✓ I can show that variation in traits can be influenced by the environment.
- ✓ I can analyze fossil data to show the previous existence of organisms and their environments.

6

FINDINGS IN FOSSILS

Fossil Predictions

WHAT YOU NEED:

FROM THE KIT:

- 2 teeth
- 2 shells

WARNING! CHOKING HAZARD - Small parts. Not for children under 3 years.

1. Look at the two shells.
2. Fill in the predictions for the shell chart.

Shell Chart		
Predictions	 Shell 1	 Shell 2
What traits does the shell have?		
What habitat would the shell be found in?		
What organism did the shell come from?
