

Make a Kite!

What to Do:

1. Cut out the pattern shape.
2. Find a large piece of construction paper (or use a paper bag!)
3. Fold the paper in half, and put the longest part of the pattern along the fold.
4. Cut out the shape around the pattern. Fold along the dotted line.
5. Reinforce the side points with a piece of tape, then cut a hole where the circle is using a hole punch.
6. Attach string, and let it fly!
