

# WHY DO SCIENCE WITH HST?

## TRUSTWORTHY

We started 25 years ago providing fellow teachers and parents with specific, one-of-a-kind science products. Since then, our customer base has grown and diversified, but our mission—to inspire learning—hasn't.

## CUSTOMIZABLE

We design our products to work in isolation and in conjunction with other products. As a help, we offer custom, curated, and DIY product kits, with easy reordering options.

## EDUCATOR SUPPORT

We get teachers excited about science by providing timely lesson plans, provocative experiments, and thoughtful curriculum options. The result? Excited students (and future scientists).

## REWARDS

We offer a generous rewards program. We award credit points with every purchase, discounts on bulk orders, and promotional deals tailored to interest, season, and semester.

## ACCESSIBILITY

We offer a full range of products in subjects from Astronomy to Zoology. The products are accessible, inclusive, and fun. Ordering with us is transparent, pricing is competitive, and satisfaction is guaranteed.

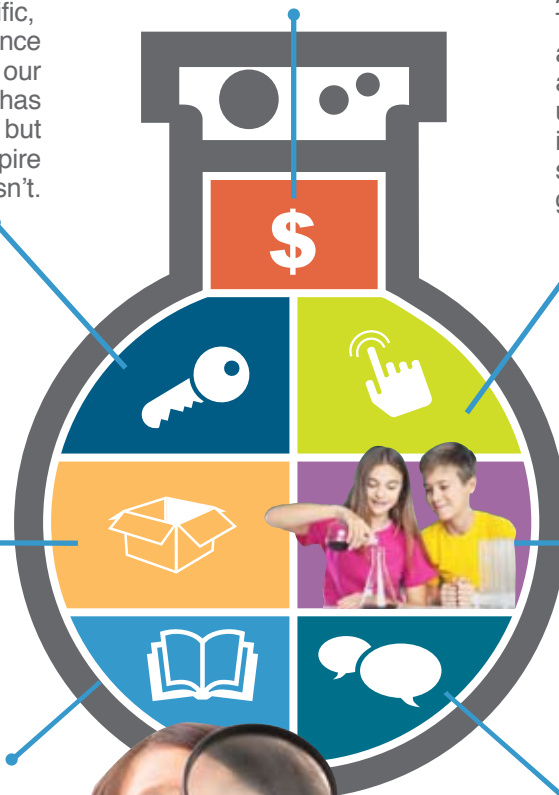

## QUALITY PRODUCT

We test our products on real scientists, teachers, and students. Our goal is to sell products that are durable, easy-to-use, and effective for learning.

## CUSTOMER SERVICE

We keep our customer support team on site at company headquarters in Billings, MT. Our team is available during standard business hours to answer questions and troubleshoot problems via phone, email, and chat.

Science education is getting a makeover. Rote memorization is out, experiential learning is in. Are you prepared? Take the lead and partner with a company that understands your priorities. We'll help you engage your students in hands-on, project-based learning that will prepare them for a bright and successful future.
