SECTION 4: FIRST AID MEASURES

Eyes: Flush with water for 15 minutes, lifting eyelids. Consult a physician.

Skin: Take off contaminated clothing and shoes immediately. Flush with soap and water. If there are effects or symptoms, consult a physician. Wash contaminated clothing before re-use.

Inhalation: Remove to fresh air. If breathing has stopped, give artificial respiration, get medical attention. If the victim has difficulty breathing, seek medical attention immediately.

Ingestion: Do not induce vomiting. Seek medical attention immediately. Vomiting may occur spontaneously and should not be avoided; roll the patient on their side to prevent aspiration of residual vomit. Never give anything by mouth to an unconscious person. Do not provide mouth-to-mouth respiration to a patient who has ingested product. Instead, use intermediate manual resuscitation equipment to provide artificial respiration.

Notes for doctors: There is no specific antidote. In cases of ingestion, a gastric lavage may be performed if special measures are taken to avoid aspiration (tracheal tube with cuff inflated). Because formaldehyde is corrosive to gastric mucosa, special care should be taken when inserting the Nasogastric probe. Use of activated charcoal is controversial; efficacy in absorbing formaldehyde has not been established and use can interfere with subsequent endoscopy. Intravenous ethanol should be used in cases of elevated methanol blood level. Hemodialysis is a good therapeutic option in serious cases with severe metabolic acidosis.

Treat for shock with hydration and drugs if necessary. Treatment should also include support measures to correct electrolyte and metabolic disturbances, as well as respiratory assistance. Continuously monitor hepatic and renal function.

SECTION 5: FIRE-FIGHTING MEASURES

This product, because of the high volume of water included, is not considered flammable or combustible.

SECTION 6: ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment & emergency procedures: Use impermeable suit and protective gloves, PVC boots and gloves. Respiratory protection should be used depending on the concentration present in the environment or the extensiveness of the spill / leak. Full face masks with a replaceable filter for organic vapors or supplied-air masks should be used for respiratory protection. Ensure adequate ventilation. Evacuate personnel to safe areas. Avoid breathing vapors and mists.

Environmental precautions: Avoid contamination of water by preventing access to drainage systems. Prevent spilled product from reaching bodies of water. If water is contaminated with a formaldehyde concentration ≥ 10 ppm, add activated carbon to absorb product. Dike for recovery or disposal. Small amounts, flush to sewer.

Methods and materials for containment and cleaning up: Contain and recover spilled material using absorbent material. Place residues in a container for disposal according to local regulations. Remove residual material with detergent, neutral soap or alcohol. Add sodium bisulfate.

SECTION 7: HANDLING & STORAGE

Precautions for safe handling: Store in cool dry area with suitable ventilation. Avoid contact with skin and eyes. Avoid formation of aerosols. Wash hands after use.

Conditions for safe storage, including any incompatibilities: Keep container tightly closed in a dry and well-ventilated place. Recommended storage temperature = 2 - 8°C. It is recommended to not store near chlorides, acids, alkalis, oxidizing agents, isocyanides, or anhydrides. Obey all hazard warnings when containers are emptied.

SECTION 8: PRECAUTIONS TO CONTROL EXPOSURE / PERSONAL PROTECTION

Control parameters: See Section 3

Appropriate engineering controls: Maintain air concentrations below occupational exposure standards as shown in Section 3 using exhaust ventilation or other engineering controls.

Personal Protective Equipment:

Eye / Face Protection: Approved safety glasses or goggles. Face shield as needed.

Skin Protection: Chemical protective equipment selected according to the concentration and amount of dangerous components at the specific workplace. Handle with gloves to avoid skin contact.

Respiratory protection: Where risk assessment shows air-purifying respirators are appropriate, use a full-face respirator with organic vapors filters or filter specifically made for formaldehyde. Use a NIOSH (US) or CEN (EU) approved respirator and filters.

Thermal hazards: None.

SECTION 9: PHYSICAL & CHEMICAL PROPERTIES

Appearance:	Colorless	Upper Explosive Limit:	8.6%

SECTION 10: STABILITY & REACTIVITY

Reactivity: Avoid using in the presence of strong oxidizing agents.

Chemical stability: This product is stable under normal storage conditions.

Possibility of hazardous reactions: Will not polymerize.

Conditions to avoid: Strong oxidizing agents.

Incompatible materials: It is recommended to not store near chlorides, acids, alkalis, oxidizing agents, isocyanides, or anhydrides.
